

Values are read from the val and range variables.

3

-----  
Procedure: Write Procedure  
-----

...

Program: Test Assignment  
-----

Variables:

- \* val (Integer)
- \* range (Double)

Steps:

- 1: Assign to val, 23
- 2: Assign to range,  $1 + \text{val} / 100$
- 3: Output val and range to the Terminal

Expressions are evaluated first

Values read are passed to the Write Procedure

4

1 Third Instruction is executed

5

Output appears in Terminal

**Main**

val: 23

range: 1.23
