Step 4 reads, and then increments the value of i

1

Print Line

length: 3

i: 3

Instruction: Step 4

...

Instruction: ...

```
Procedure: Print Line
-----------------------------
Parameters:
1: Length (Integer)
Local Variables:
* i (Integer)
Steps:
 1: Assign i, the value 0
 2: While i < Length
 3:     Output '-'
 4:     Increase i by 1
 5: Output a new line
```

Step 4 is the end of the loop, so after Step 4 control jumps back to Step 2
